DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to feedback and control, classified in class 726, subclass 3.
 - II. Claims 19-27, drawn to collecting events and forwarding events, classified in class 726, subclass 22.
 - III. Claims 28-30, drawn to pinging a security agent, classified in class 713, subclass 168.
 - IV. Claims 31-56, drawn to hierarchical event structures, classified in class 726, subclass 16.
 - V. Claims 57-67, drawn to queuing security events, classified in class 726, subclass 11.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III, IV, and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are as follows:

I – security events are used to actively change control of a system

II – events are categorized into tiers for forwarding to one of two systems based on availability of security

- III – pinging an agent is used to determine if it is online for downloading of a command
- IV – identifying different levels of security and placing management information into each level
- V. – queuing security events meeting certain criteria

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brandon S. Hoffman whose telephone number is 571-272-3863. The examiner can normally be reached on M-F 8:30 - 5:00.
